

# Cloud Storage Network Server

**Organisations are continuing to seek ways to ensure ICT is an enabler of core business activities and not a constraint.**

The cloud has the potential to transform everything in business. It can empower organisations to become more adaptive, agile and competitive. It can propel businesses to new heights and open the doors to many possibilities.

The foundation of any cloud based strategy, however, is having the most appropriate storage solution.

Opus Software Solutions Cloud Storage is ideal for organisations wishing to easily and quickly expand beyond existing storage constraints or for those seeking an easy, offsite disaster recovery solution.

Opus Software Solutions Cloud Storage is the foundation for all other cloud Infrastructure services such as Virtual Machine and Virtual Desktop Interfaces. Opus Software Solutions Cloud Storage is therefore essential for organisations wishing to easily migrate to a fully virtualised, or private cloud, network environment.

## Cloud Storage at a glance

- Maintains technical lead with the latest technology to keep your organisation competitive.
- Reduces ongoing maintenance costs for improved bottom line.
- Reduces power consumption; go Green IT and reduce power bills.
- Easily access Cloud Storage from any location with Internet connection to empower your mobile workforce and teleworkers.
- Foundation for migration of your LAN to full Cloud Virtualisation.
- Industry leading 100% Service Level Agreement for complete confidence.

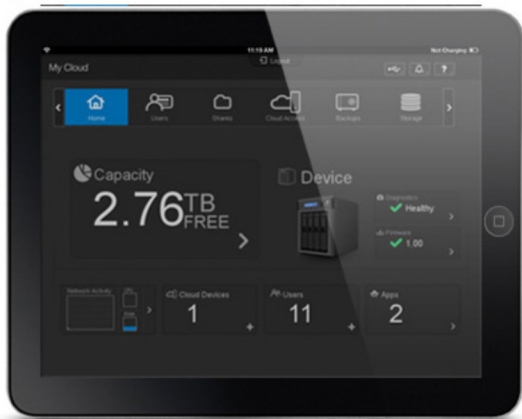

## Drive management and data protection at its best

You're armed with multiple options to secure your data from loss. Choose RAID 0, 1, 5, 10 or select from spanning and JBOD modes for even more options to manage your data.

## Easy to manage

A powerful dashboard and LCD display means your system is always under your control. Monitor your drives, manage users and utilize energy-saving features. Email and mobile alerts keep you informed on My Cloud status.

## Stream media to your connected devices

Stream videos and photos to connected TVs, media players, gaming consoles and other DLNA/UPnP devices. Features a Twonky 7.2 and a DLNA-certified 1.5 media server. And with My Cloud iTunes server, you can easily stream your music collection.

## Advanced serving options

Integrated file server, FTP server, backup server and P2P torrent download server.

## Increase your personal cloud capacity

Simply attach a compatible USB hard drive directly to one of the two USB 3.0

expansion ports on My Cloud and instantly expand your storage capacity.

## Award-winning desktop and mobile apps

With My Cloud mobile and desktop apps, you can upload, access and share your documents from anywhere. Conveniently transfer files from your public cloud accounts to My Cloud directly from anywhere with the help of the mobile app.

## Powerful apps to customize your NAS

Featuring industry-leading apps, including aMule, Icecast, Joomla!, phpBB, phpMyAdmin and SqueezeCenter.

## Back up, your way

Protect your data with remote backup to another My Cloud integrated cloud backup or local LAN/WAN backup. PC users, SmartWare Pro offers options for how, when and where you back up your files for up to ten computers. Mac users, utilize all the features of Apple Time Machine backup software to protect your data.

## Your own personal cloud

Unlike public clouds, My Cloud allows you to keep all your content in one safe place on your home or office network instead of a remote server. No mysterious location of your data. No monthly fees. No limits. Just blazing-fast performance for your high-speed digital life.
